

- [Information for Software Developers](#)
- [List of Commercial Software Providers](#)

As of the Aug 2010 filing period, licensed fuel suppliers, importers, refiners, and/or distributors can file their Utah fuel tax returns electronically in XML format. For all tax periods prior to Aug 2010 Utah will continue to require the returns and amended returns to be filed on paper forms.

Contact your tax software vendor or accounting service to see if they support the Utah electronic fuel tax return. [Click here](#) for a listing of software providers.

For questions about this program, contact [ftx@utah.gov](mailto:ftx@utah.gov).

## Information for Software Developers

The following information is provided for Programmers and Software Developers for developing their Utah electronic fuel tax return.

**Note:** State government offices are open 8:00 a.m. to 5:00 p.m., Monday through Friday. Test submissions must be submitted within these hours. The testing database is re-set every Friday and available again the next Monday.
